

We have a new version of InscriptiFact (Version 10.0, Build 286) that testing indicates may correct the problems with Windows and especially Windows 10. Mac users may find the new version useful as well.

Windows Users will need to:

- \* Click the Uninstall InscriptiFactDigitalLibrary desktop icon to uninstall your current version of InscriptiFact.
- \* Click the Uninstall ISFStandaloneViewer desktop icon to uninstall your current version of the ISF Standalone Viewer.
- \* Once the uninstall operations are complete, reboot your machine.

To install the new version of InscriptiFact, go to:

<http://ruth.usc.edu/Inscriptifact/>

Download the "Recommended installer for your platform..."

Install the application using the "Easy" installation.

To install the new version of the InscriptiFact Standalone Viewer, go to:

<http://ruth.usc.edu/ISFStandaloneViewer/>

Download the "Recommended installer for your platform..."

Install the application using the "Easy" installation.

Mac Users will need to:

- \* Go to your main Applications folder
- \* Drag the folder, InscriptiFactDigitalLibrary, to the trash
- \* Drag the folder, ISFStandaloneViewer, to the trash
- \* Empty your trash
- \* Reboot your machine.

To install the new version of InscriptiFact, go to:

<http://ruth.usc.edu/Inscriptifact/>

Download the "Recommended installer for your platform..."

Install the application using the "Easy" installation.

To install the new version of the InscriptiFact Standalone Viewer, go to:

<http://ruth.usc.edu/ISFStandaloneViewer/>

Download the "Recommended installer for your platform..."

Install the application using the "Easy" installation.

Please update us if you have any difficulties.
